

CHARLESON DAVIS

Full Stack Software Engineer | AI & Machine Learning

charlesondavis@gmail.com | +49 1515 607 1641 | Göttingen, Germany | linkedin.com/in/charlz1717 | github.com/normandy17

✓ Family Reunification Visa — authorised to work full-time in Germany (no sponsorship required)

PROFESSIONAL SUMMARY

Software Engineer with 5 years of enterprise experience building full-stack products at scale, specialising in React, Node.js, and CI/CD automation. Recently completed intensive AI & Machine Learning training (Ironhack Berlin, 2026) with hands-on projects in NLP, Generative AI, LangChain, LangGraph, and Retrieval-Augmented Generation (RAG). Combines production-grade software engineering with modern AI application development. Based in Göttingen with full-time work authorisation in Germany.

WORK EXPERIENCE

Full Stack Developer | [Sapiens International Corporation](#)

2021 – 2026 Bengaluru, India (Remote-capable)

- Contributed to R&D and development of a no-code platform for creating digital journeys and forms, serving 10+ enterprise insurance clients across 3 continents.
- Built and maintained React front-end components and Node.js backend services; reduced UI bug backlog by ~35% through systematic component refactoring.
- Managed CI/CD pipelines and automated testing processes, cutting average release cycle time by approximately 20% and improving deployment reliability.
- Integrated platform capabilities with core enterprise systems and 5+ third-party services (APIs, payment gateways, document management).
- Served as Technical Product Owner: defined requirements, prioritised sprints, and translated business needs into technical deliverables for cross-functional teams of 8–12.
- Coordinated software releases across QA, UX, documentation, and customer teams, successfully shipping 15+ production releases.
- Delivered product support and customer enablement for enterprise onboarding, achieving high adoption rates on new platform features.

Co-Founder & Application/Sales Engineer | [Generate \(3D Printing & Manufacturing\)](#)

2017 – 2019 Bengaluru, India

- Led design and engineering analysis to optimise product functionality for B2B manufacturing clients.
- Drove cost reduction initiatives resulting in ~15% improvement in production competitiveness.
- Spearheaded business development, sales, and vendor management, expanding the client base and procurement efficiency.

External Vendor / Partner Relations | [Uber](#)

2016 Bengaluru, India

- Contributed to the launch of Uber Moto as an external vendor, managing a fleet of 50+ drivers.
- Beta-tested the Uber Dost app, delivering structured feedback that informed product enhancements.

KEY PROJECTS

BabyOS — AI-Powered Pregnancy Companion

Multi-agent AI application using LangChain, LangGraph, ChromaDB, React, and Supabase. Implemented RAG over medical and Germany-specific knowledge sources; built role-aware personalised experiences for mothers, fathers, and partners with week-based responses.

ReviewSense — NLP Product Review Intelligence

NLP platform for sentiment classification and product category discovery. Integrated Generative AI to auto-generate buying guides from customer feedback; deployed as an Amazon-style Streamlit application with interactive analytics.

Poetic Justice — Fake News Detector (DistilBERT Ensemble)

Binary NLP classification pipeline (fake vs. real news). Benchmarked traditional ML algorithms against transformer-based architectures; improved accuracy through ensemble modelling and feature engineering.

E-commerce & Full-Stack Clones

Built full-stack applications including an e-commerce Super Shopper platform, Amazon Prime Video clone (with Razorpay integration), and a Google Keep PWA clone — all using React, Redux, Node.js, MongoDB, and Express.

TECHNICAL SKILLS

Frontend: React.js • Next.js • TypeScript • JavaScript • Redux • Tailwind CSS • HTML5 • CSS

Backend & DB: Node.js • Express • MongoDB • SQLite • REST APIs

AI / ML: Python • LangChain • LangGraph • RAG • ChromaDB • Vector Search • NLP • Deep Learning • Generative AI • Prompt Engineering

ML Libraries: Scikit-Learn • Transformers (HuggingFace) • Pandas • NumPy

DevOps & Tools: CI/CD Pipelines • Git • Agile / Scrum • Data Structures & Algorithms

EDUCATION

Artificial Intelligence & Machine Learning — Ironhack

March 2026 – June 2026 | Berlin, Germany

Full Stack Web Development — Masai School

2020 – 2021 | Bengaluru, India

Bachelor of Engineering — Acharya Institute of Technology

2010 – 2014 | Bengaluru, India

LANGUAGES & SOFT SKILLS

Languages: English (IELTS 8.0 — C1) • Deutsch (A1, actively improving) • Malayalam (native) • Hindi • Kannada

Soft Skills: Agile Product Ownership • Stakeholder Management • Remote Collaboration • Problem Solving • Team Leadership
